Midterm Exam

Description

First, answer the database concept questions. You shouldn't need anything else to answer these questions.

Then, take some time to examine the table design. Draw a physical schema diagram if helpful for reference.

Finally, use the table design to answer the physical design questions and the data analysis questions.

Good Luck!

Submission Instructions

Hand-in your exam booklet to an instructor when finished.

Evaluation Criteria

exam_section	section_weight	comments
Database Concepts	(40% weight)	See individual question weights for a break-down.
Physical Database Design	(30% weight)	See individual question weights for a break-down.
Data Analysis	(30% weight)	See individual question weights for a break-down.

After being evaluated, each student's submission will be ranked. These rankings may positively impact final grades.
